## **DETAILED ACTION**

### ***Reasons for Allowance***

US Patent number 6,628,333 to Gowda et al. represents the closest US Patent Prior Art of record. International Publication WO 97/06958 to Cane et al. represents the closest Foreign Prior Art of record. "Polaroid introduces New Single-Use Instant Camera" (hereinafter Polaroid) represents the closes non-patent literature Prior Art.

The present invention stands patentable over the prior art of record for the following reasons:

1. The present invention requires a one-time camera (also called single use). In other words, the camera includes features which prevents the user from reloading or refilling the camera himself/herself.
2. The present invention requires the one-time camera to be digital. In other words, the camera must store photographed images electronically on a storage medium such as solid state memory or a hard disk.
3. The digital, one-time use camera must include a printer and a cutter. The cutter requires the print media to be a roll rather than sheets of paper, as used by Polaroid cameras.
4. The digital, one-time use camera must have an authentication means. Examiner finds that it would not be obvious to include an authentication means in a camera that a user can reload him/herself as the camera would not be required to be authenticated by a refurbishing station.

### CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
